

Shot shell holders for you who don't shoot open is one of the areas of 3 gunning that has seen more new products in the past couple of years than any other innovation. With the onslaught of the load 2 / load 4 method we have seen many new products. The load 2 / 4 method has evened out the game of shotgunning by providing newer shooters with a gross motorskill loading method that can be learned and maintained more quickly than the load 4 / stuff 'em in method.

There are quite a few companies out that make products you might like and there are a wide variety of prices. I try and list many of them here and discuss some of the pros and cons. I have had my hands on almost all of them at some point. I will try and focus on those items that hold 4 shells for comparison. You can basically double the price for each additional 4 shells you would want to hold.

TACCOM <http://www.tacom3g.com/>

Tacom is a MN based company and Tim is a 3 gunner with many designs. He has products in all price ranges. If you like to keep your money in Minnesota, give Tim a call, he is knowledgeable and will get you set up with what you need.

The duaload is one of the most economical systems at a price of 18.00 for a 4 shell caddy. If you want something to hold your shells securely or are not in the game to win the loading race this item is a good one to begin with. You can affix a techlock, safariland or like product to the back in any angle configuration the holes will allow.

The quaload from Taccom is the next step up with a price of about 40 dollars for a 4 shell holder. This product allows you to grab all 4 shells at once.

CARBON ARMS <http://www.carbonarms.us/TWinS-Shotgun-Loading-Systems/>

This company offers 2 distinct set ups. The pinwheel system (SSL) and the (FSL) Fast Shotgun Loader. This is a shooter owned company, with both Mark and James being good guys with a nice product line.

The SSLP4 is around 40 to 50 dollars depending on if you need a techlock backer. For each additional 2 rounds added to the system you can expect to pay about 20 dollars.

[SSLP4 Pinwheel](#)

[SSI Pinwheel](#)

The FSL system is an 8 shell minimum shotshell holder and is 96 dollars, cut in half that is 48 dollars per 4 shells. This item is very compact and will assist with saving space on the belt.

AP CUSTOM <http://www.apcustomusa.com/>

AP is another shooter owned company and Aaron is a heck of a guy.

L2/4 Shotshell Carrier: The L2/4 is a 4-round 12 ga. shell carrier system which consists of two L2 shell carriers mounted to an adjustable billet aluminum backer plate mounted to a Blade-Tech Tek-Lok. The L2/4 backer plate allows the shooter to adjust the angle and orientation of the two L2s to his or her liking. The backer plate is also

drilled and tapped to accept Safariland ELS and Blade-Tech MOLLE attachments

This item will run you about 48.95 or thereabouts.

4x4 Shotshell Carrier: Our flagship 8-round shotshell shell caddy. Holds four 2 3/4 in. 12 ga. shells in two adjacent slots. The 4x4 is the most efficient use of belt real estate on the market. Designed for loading four shells at once, either strong or weak-handed.

The 4x4 will cost roughly 70.00

4 X 4 Shotshell Carrier

California Comp Works listed on Brownells site.

<http://www.brownells.com/shooting-accessories/speedloaders-accessories/shotgun-shell-holders/12-gauge-speed-stripper-prod4148.aspx>

For 20 dollars this is one of the most economical ways to get into shotgun loading gear.

Load Two

Patent pending

CHAMELEON
FABRICS

www.chameleon-fabrics.cz

Mark Otto makes a Similar System to the Chameleon. He is a bit hard to contact but can be reached through Triangle Shooting Sports.

<http://triangleshootingsports.com/>

He also has traditional vertical 4 shell caddies. I think they run 45 dollars.
